EXPERT SOLUTIONS FOR INDUSTRIAL EFFICIENCY

- ▶ REDUCE COSTS
- ▶ SAVE TIME
- ▶ IMPROVE SAFETY

Why TengTools?

- **Expert Industrial Solution Provider** – More than just tools; we deliver solutions for tool control and organisation.
- **Proven Cost Reduction & Efficiency Gains** – Our *Get Organised™* system cuts downtime, improves productivity, and enhances workplace safety.
- **Dedicated Sales & User Support** – We work alongside businesses to design tailored tool control solutions that match their exact needs.

Get Organised™

DESIGNED IN SWEDEN

**QUALITY PRODUCTS THAT COMBINE
SWEDISH DESIGN AND ENGINEERING WITH
A STRONG ENVIRONMENTAL AWARENESS.**

At TengTools, our products reflect the precision, durability, and reliability that Swedish engineering is known for. Designed with a focus on quality and sustainability.

We prioritise functionality, ergonomic design, and long-lasting performance—ensuring that each tool not only meets, but exceeds, the demands of professionals worldwide.

With a focus on sustainability, when you Get Organised™ with TengTools, you minimize the need to replace tools. That is sustainability in a nutshell.

STREAMLINE YOUR WORKFLOW

TAILOR YOUR TOOL SOLUTION TO YOUR NEEDS

TengTools offer a modular tool system that is built to last.

Build your ultimate tool kit with our large selection of storage and tool sets enabling customised tool solutions for any kind of industry or profession.

Don't waste space and money on tools you don't need. Buy the exact tools you require and if you need more in the future, just add new sets that fit seamlessly into your storage solution.

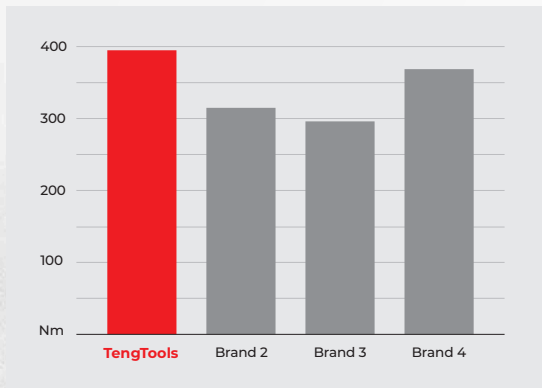

When you purchase TengTools you are guaranteed the highest quality. If a tool is worn out or if you happen to lose a piece, individual tools can be easily purchased as replacements.

LIFETIME GUARANTEE

QUALITY IS EVERYTHING

All our tools meet – or exceed – the demands in ISO, DIN and other international standards. As an extra security for you, our tools are offered with a guarantee against material and manufacturing defects during the normal lifetime of the product in question. Defective products covered by the guarantee will be repaired or replaced.

Adjustable wrench Comparison test. May 14, 2020. Torque breaking point (Nm). ISO 6787:2018.

Proven to be better.

Independent tests have shown that our tools not only exceed the international quality standards – they are best in class. TengTools was positioned first or second in all of the eight product categories tested.

* Defects or performance issues caused by accidents, not approved modifications, misuse, normal wear & tear or lack of proper care are excluded.
A guarantee claim requires the submission or shipment of the complete product to the retailer or distributor along with a receipt or invoice validating the purchase date and the product designation.
Returned products are first managed by the distributor network, entrusted with applying TengTools' warranty and replacing items on stock. Replacement or repair of the product will be carried out as quickly as possible.

FOR A BETTER WORKFLOW

BENEFITS OF A WELL-ORGANISED HAND TOOL SOLUTION:

Time Saving: An organised tool storage system can help you save time by reducing the time you spend searching for tools. When you have a designated spot for every tool, you can quickly locate the one you need.

Increased productivity: An organised workspace can help you work more efficiently and effectively. When you have a clear idea of where each tool is located, you can work faster, and the time you save can be used to complete more tasks.

Improved safety: A disorganised tool storage system can lead to accidents, such as tripping or falling, and injuries caused by misplaced tools. An organised system, on the other hand, reduces the chances of accidents and ensures that each tool is in its designated place, making it less likely to be left lying around where it could cause harm.

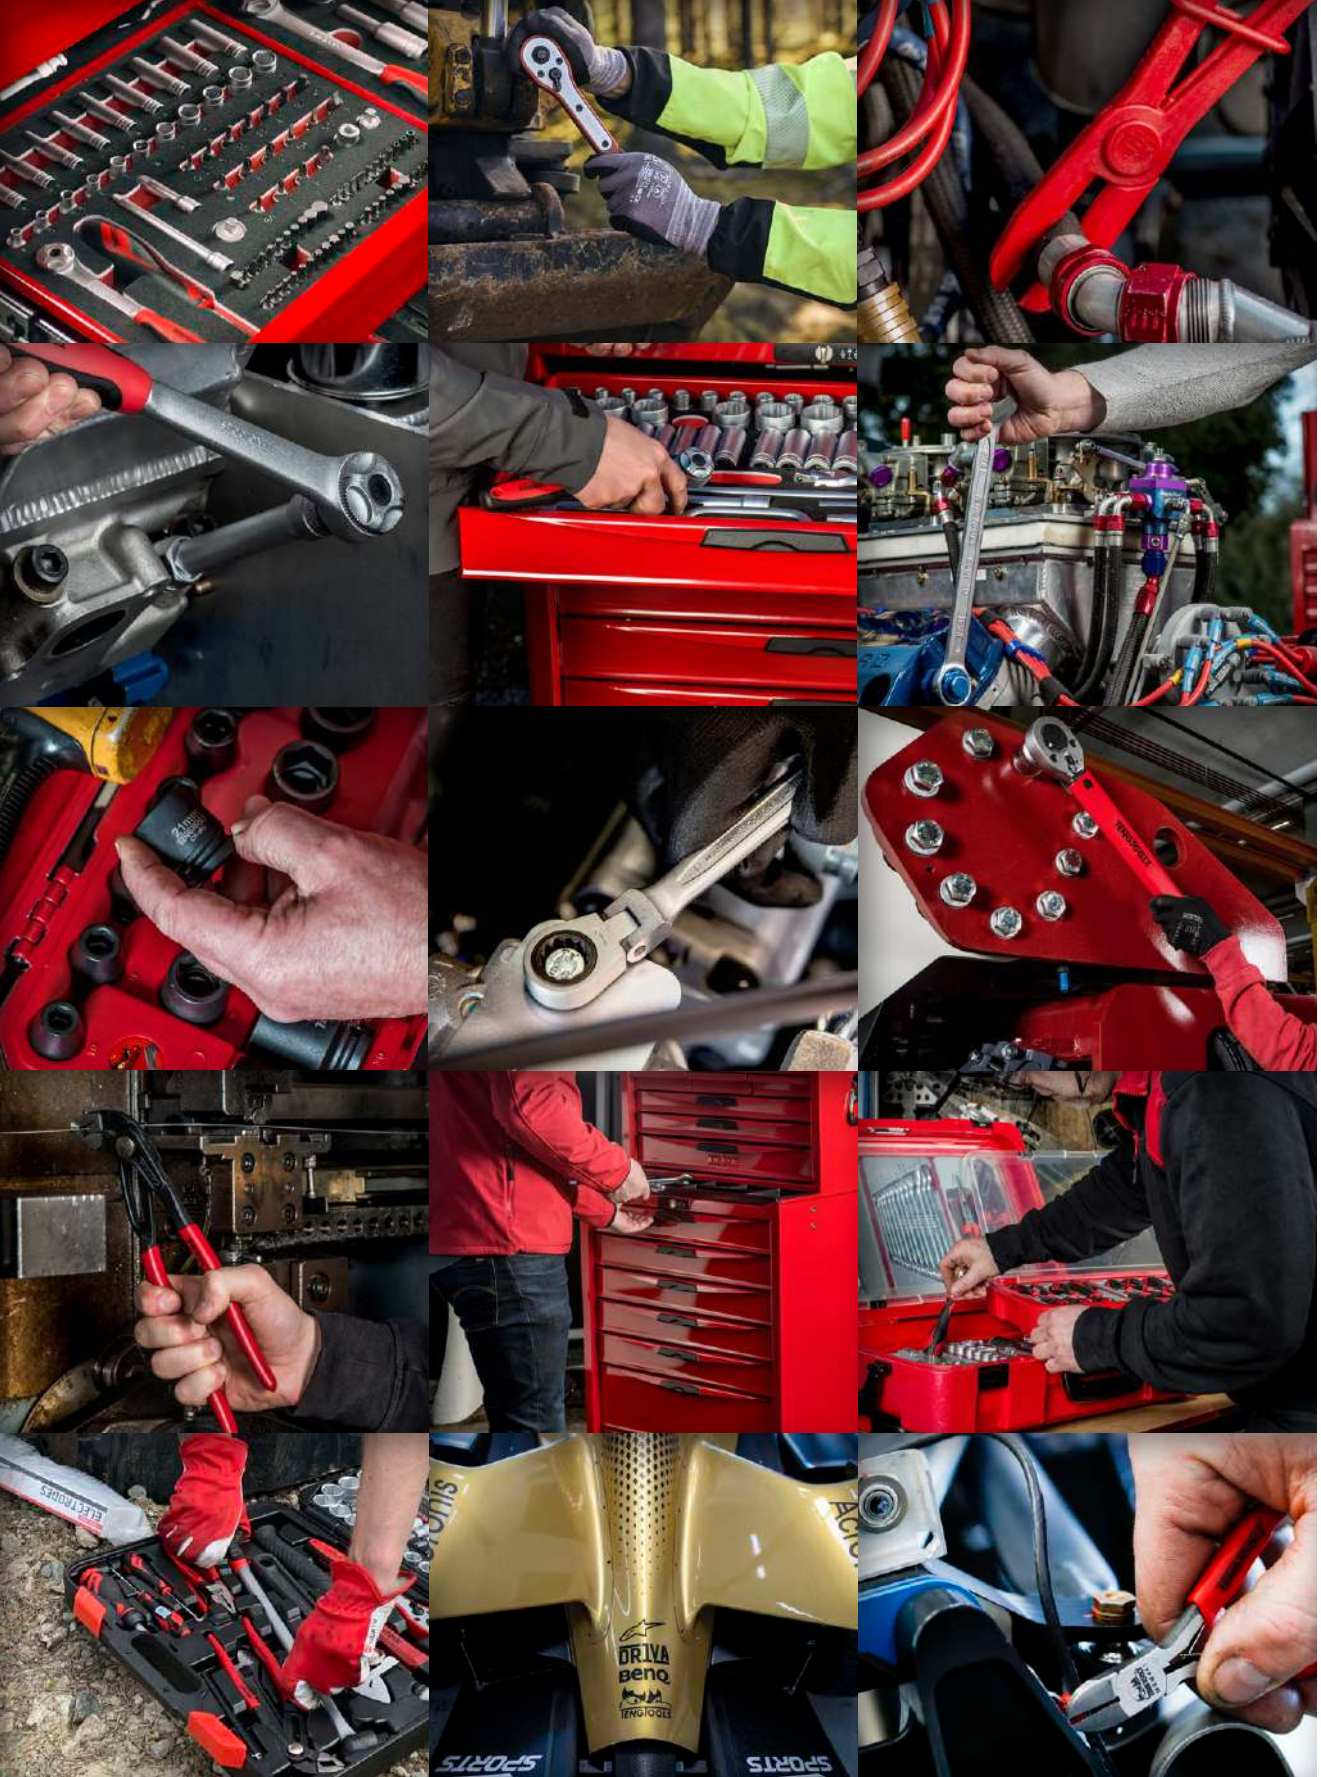

Cost-effective: An organised tool storage system can help you avoid buying tools you already have or replacing lost ones, saving you money in the long run.

Better tool longevity: When tools are stored properly, they are less likely to suffer damage from being knocked around or exposed to moisture or extreme temperatures. This means that they will last longer and perform better.

Sustainability: When you Get Organised™ with our long-lasting tools, you minimize the need to purchase replacements. That is sustainability in a nutshell.

BESPOKE FOAM KITS

BENEFITS OF A WELL-ORGANISED HAND TOOL SOLUTION:

- **Custom layouts** designed around your tools and workflow
- Maintains **TengTools quality**, fit, and finish
- **Flexible solutions** for standard and specialist equipment
- **Clear tool visibility** for fast checks and control
- **Reduced tool loss** and improved accountability
- **Consistent layouts** across teams and locations
- Supports **organised and controlled** working environments
- Compatible with **Smart Access and RFID** tool control

Get Organised™

TT SERIES TOOL KITS

BETTER TOOLS BRING BETTER RESULTS

Each tool kit has been compiled with the help of technicians from various trades and are available in many shapes and sizes. From full stacks to roller cabinets, and top boxes to portable solutions, there is a kit to fit your exact needs

TT SERIES

Space-saving: The TT Series allows you to fit more tools in each drawer.

Durability: TT Series tool trays are made from a durable recyclable plastic that can withstand heavy use and are resistant to wear and tear.

Easy to clean: TT Series tool trays can be easily wiped clean with a damp cloth, making them simple to maintain and keep clean.

Lightweight: TT Series tool trays are lightweight, making the toolkit easier to move around and transport as required.

Corrosion-resistant: TT Series tool trays are resistant to corrosion, making them ideal for use in humid or damp environments.

TT SERIES TOOL TRAYS

A FLEXIBLE TOOL CONTROL SYSTEM WITH OVER 240 TOOL SETS

The TT Series offers a space-saving tool control system allowing you to fit more tools in each drawer. With our wide assortment you can build some of the largest tool kits in the market, with over 1000 tools in a 26" wide stack. The tool trays are made of recyclable plastic that is easy to clean and they are ideal for use in dirty or high moisture environments.

1 CHOOSE YOUR STORAGE

Storages for all needs.

2 CHOOSE YOUR TOOL SETS

Your kit. Your way.

3 ORGANISE YOUR KIT

Optimise your workflow.

FOAM SERIES TOOL KITS

BETTER TOOLS BRING BETTER RESULTS

Each tool kit has been compiled with the help of technicians from various trades and are available in many shapes and sizes. From full stacks to roller cabinets, and top boxes to portable solutions, there is a kit to fit your exact needs

FOAM SERIES

Protection: FOAM Series tool trays provide a protective layer between the tools and the storage solution, helping to prevent damage and scratching.

Organisation: Each tool has its own place with its description imprinted in the 3-coloured foam. The contrasting colours make it easy to identify tools and see when a tool is missing.

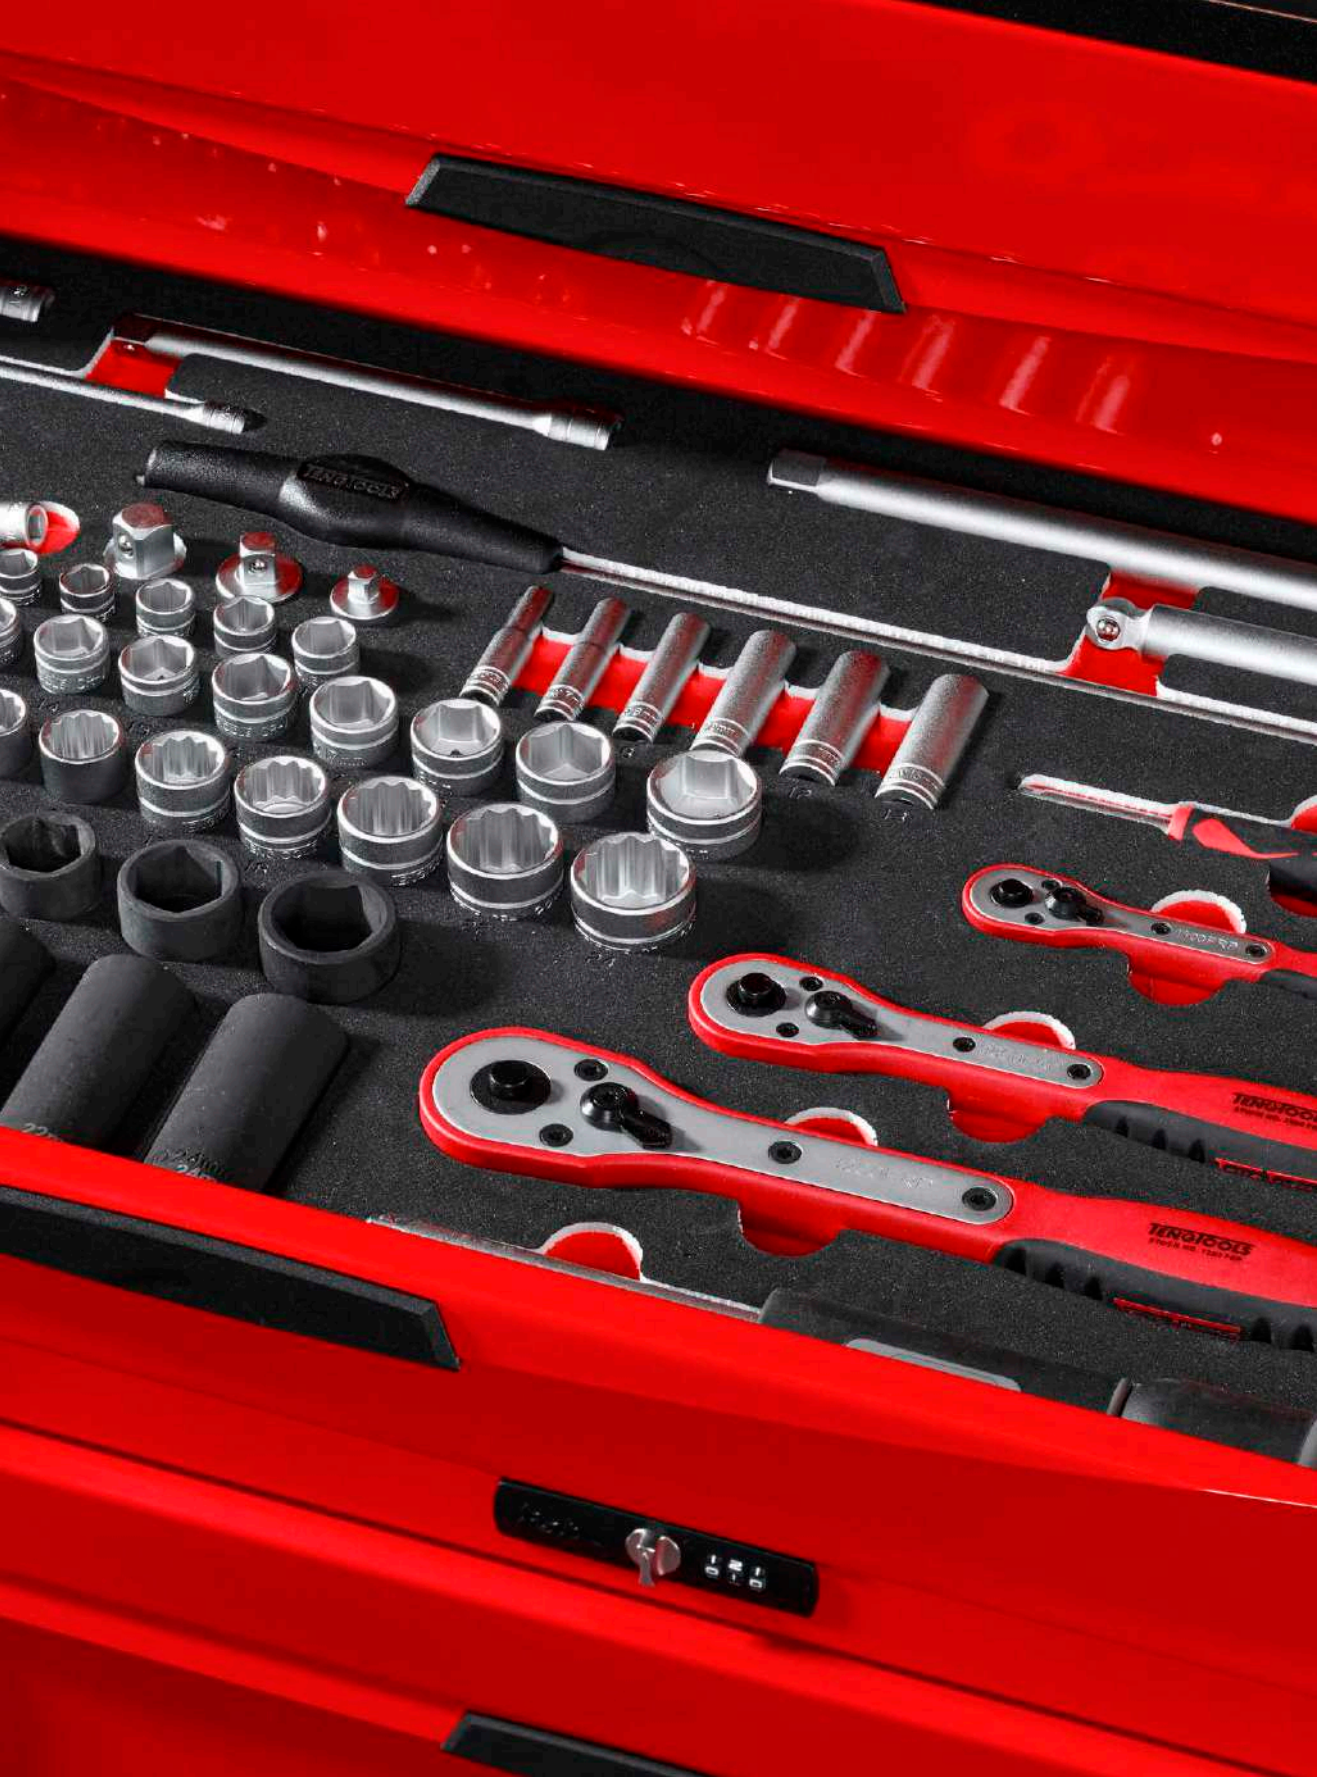

Customisability: We can provide a bespoke custom FOAM Series toolkit based around your existing tools and equipment. Contact your local retailer for more information.

Safety: FOAM Series tool trays can also help reduce the risk of injury by keeping sharp or dangerous tools secure and separated from other tools.

Cold environments: The high quality FOAM stays soft and flexible even in cold environments and gives the tool kit a premium look.

FOAM SERIES TOOL TRAYS

A FLEXIBLE TOOL CONTROL SYSTEM WITH OVER 240 TOOL SETS

The Foam Series offers the ultimate tool organisation. Each tool has its own place with its description imprinted in the 3-coloured foam. The contrast colours makes it easy to identify tools and see when a tool is missing. The high quality foam stays soft and flexible even in cold environments and gives the tool kit a premium look.

1 CHOOSE YOUR STORAGE

Storages for all needs.

2 CHOOSE YOUR TOOL SETS

Your kit. Your way.

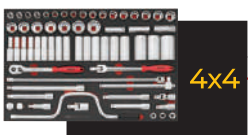

3 ORGANISE YOUR KIT

Optimise your workflow.

PRO35™

MADE FOR PROFESSIONALS

Introducing the next generation in tool storage, specifically designed to cater to the demands of professionals in automotive, maintenance, engineering, and motorsport. Crafted with a robust 3-piece heavy gauge steel cabinet frame and fortified with our advanced 5-step phosphate-free rust protection, they are built to last even in the toughest work environments.

**3-PIECE HEAVY GAUGE
STEEL CABINET FRAME**

**5-STEP PHOSPHATE-FREE
RUST PROTECTION**

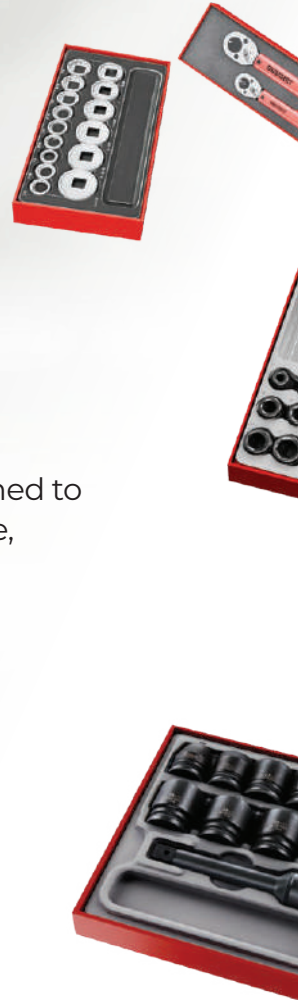

**3-DIGIT
COMBINATION LOCK**

**UP TO 40KG DRAWER
LOADING CAPACITY**

**ALL DRAWERS COMPATIBLE
WITH OUR MODULAR TOOL
CONTROL SYSTEM**

Read more about product care and the TengTools Lifetime guarantee here:

IMPROVED FEATURES

3-DIGIT COMBINATION LOCK

Flexible Security Options - Secure your tools with our multiple lock options. Switch between combination and key locks depending on your preference, keeping your tools safe and accessible.

FLAT ALUMINIUM DRAWER FRONT HANDLES

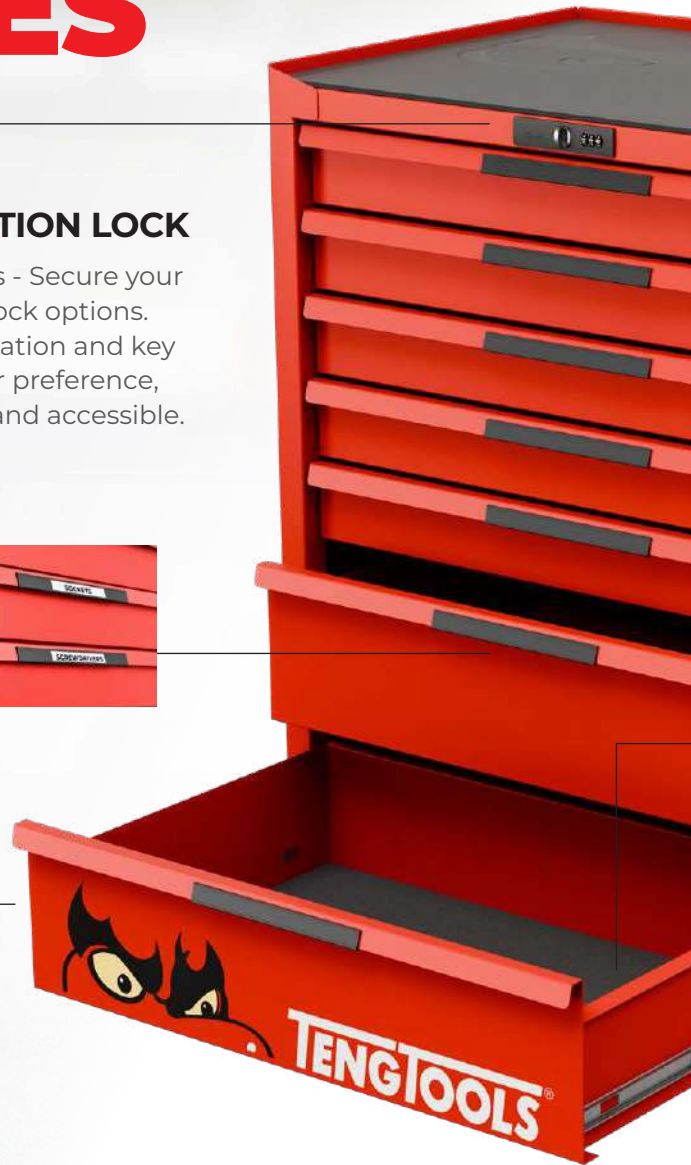

Aluminum handles with space for labelling ensure you stay organised. Label your drawers to reflect the contents, tailored by you.

NEW REINFORCED DRAWER DESIGN

Our drawers are engineered to fit TengTools Tool Control Modules seamlessly. Reinforced and capable of holding up to 40kg, they're built for heavy-duty use.

The drawers are tested pulling them out and pushing them in more than 35,000 times with maximum drawer load.

FOAM WORKTOP MAT AS STANDARD.

Upgrade to hard-wearing laminated wood or sleek stainless-steel worktops. Available in multiple sizes for a perfect fit.

COMFORT GRIP HANDLE

Ergonomically designed for ease of movement. When used with a side shelf it creates extra space for storing longer items conveniently at your side.

EXTRA TOOL PROTECTION

FOAM mats supplied in each drawer to protect loose tools while being stored.

FULL EXTENSION BALL BEARING SLIDES

Each drawer is fully extendable with ball bearing slides ensuring a smooth and reliable opening, and closing action every time.

HEAVY-DUTY CASTORS

Navigate your workspace with ease using our robust castors. Supplied with two fixed and two swivel, with brakes for stability when you need it.

RECESSED SIDE HANDLES (TOOL CHESTS)

Fold-down side handles with 150kg capacity each.

PRO35™

BOOST YOUR PERFORMANCE

Elevate your workspace with TengTools PRO35™ Series Tool Cabinets. These cabinets boast a host of enhanced features crafted to boost your performance. From reinforced drawer designs capable of holding up to 40kg to precision-engineered compatibility with our Tool Control System, every detail has been refined to ensure seamless functionality and unparalleled convenience. Say goodbye to cluttered workspaces and hello to streamlined productivity.

SOCKET SETS

ALWAYS READY FOR ACTION

Tengtools socket sets are designed with a focus on quality, durability, and accessibility. We use high-grade materials such as chrome vanadium steel for sockets, and offer a wide range of sizes in both metric and AF measurements.

The sockets are clearly marked and easy to identify, and the sets are compatible with different types of ratchets and extensions.

MECCA PRO™

SOCKET SETS

IN DURABLE, SHOCKPROOF CASES

-  Secure lock system with click mechanism so you know the top is closed properly
-  Hard-wearing hinge with metal pin for increased life
-  Retractable handle, especially designed for comfort and durability.
-  Clear layout makes it easier to see which tools are missing
-  Rubber feet to prevent the box from sliding and which protects against scratching
-  Fully recyclable packaging that helps the environment

6-point sockets v 12-point sockets

12-point sockets, common in Aircraft Maintenance and Engineering, are ideal for use in confined space and for fast lightweight work. 6-point sockets are ideal for when extra torque needs to be applied. They are designed to contact the head of a fastener well away from the corners, this dramatically reduces the likelihood of slippage and rounding over of the corners.

SOCKETS & ACCESSORIES

GET THE JOB DONE, FAST

The socket range includes drives from ¼" to 1" and includes six-point sockets and twelve-point sockets, metric and imperial sizes as well as a wide range of bit sockets including Hex, TX, TX-E, and TPX.

FRP RATCHETS

Quick release mechanism that makes it possible to release sockets and accessories with one hand

Ratchet mechanism with 45 teeth (8 degree intervals)

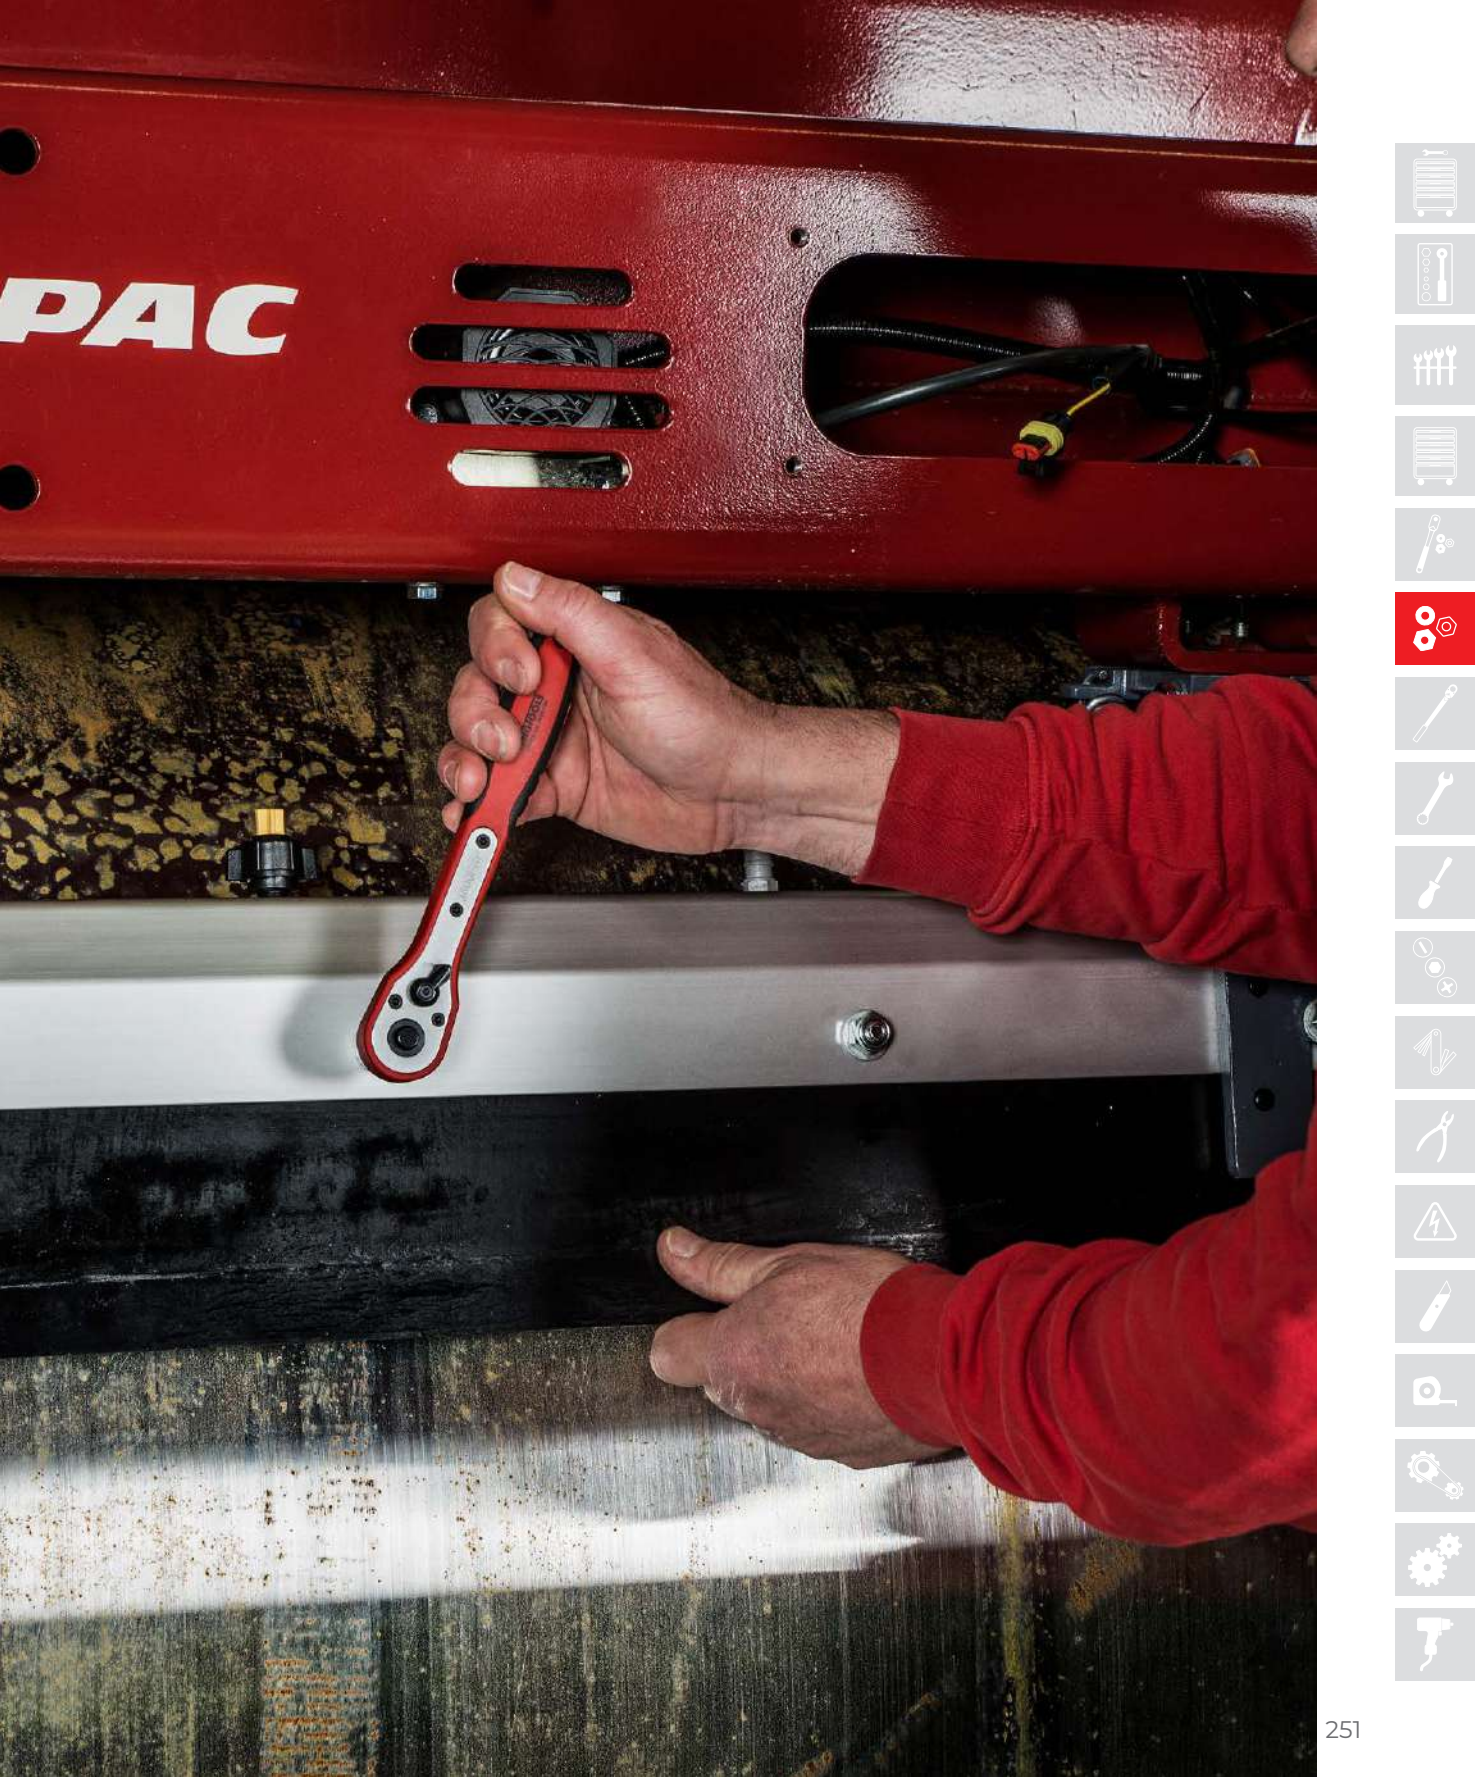

Lever for quick reversing between left and right-hand action

All individual parts and service kits are available and easy to fit

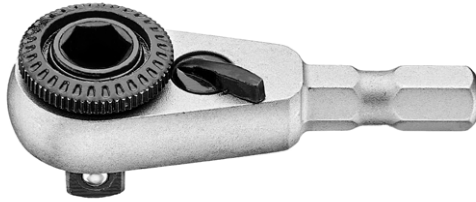

Fibre ratchet handle with steel reinforcement that is lighter than standard ratchet handles, but just as strong

Bi-material handle with an ergonomic design that makes the ratchet very comfortable to use, especially in cold environments

"Hip Grip"

All sockets are produced according to TengTools "hip grip" system, which means the socket grips on the flat surfaces of the nut rather than on the corner. This system helps to prevent damage to nuts and bolts and makes it possible to grip nuts and bolts which already have damaged corners.

6-point sockets v 12-point sockets

12-point sockets, common in Aircraft Maintenance and Engineering, are ideal for use in confined space and for fast lightweight work. 6-point sockets are ideal for when extra torque needs to be applied. They are designed to contact the head of a fastener well away from the corners, this dramatically reduces the likelihood of slippage and rounding over of the corners.

Do's and Don'ts of Socketry

DO'S

- Use the right drive
- Use the correct socket size
- Check the thread direction
- Keep it clean and dry
- Use light oil on ratchet mechanisms

DONT'S

- Do not use with impact tools
- Do not use TPX on a TX fastenings
- Do not use poles to increase leverage

TORQUE TOOLS

MAKE THE PROFESSIONAL CHOICE

TengTools torque wrenches have become an industry standard. Whether you choose the classic version that has been a favourite for many years or the new P-Series range designed for the industrial and maintenance sectors you are guaranteed quality, accuracy and reliability as standard.

TORQUE WRENCH

Click type mechanism to signal when the required torque is reached

Equipped with an in-built angular gauge for when tightening at specific angle is required

Reversible 24 teeth ratchet mechanism in according to DIN3122 giving 15° increments

Switch for changing between left and right-hand action. Designed to torque right hand only. Bi-Directional models are available.

Scale in Nm & ft/lb

Twist locking to ensure the set torque is maintained

Accurate to +/- 4% and conforms to ISO6789

TORQUE WRENCH PLUS

Quick release 72 teeth ratchet mechanism with twist reverse manufactured to DIN3122

Compact head for easier use in confined spaces

Click type mechanism to signal when the required torque is reached

Industrial quality grade steel tube for added stability

Ergonomic bi-material grip for maximum comfort when in use

Easy to read Nm scale that is simple to adjust

Locking button to ensure the set torque is securely maintained

Hanging facility which can be used together with a fall protection equipment

Accurate to +/- 4% and conforms to ISO6789

Do's and Dont's of Torque Wrenches

DO'S

- **Use carefully:** Torque wrenches are a measuring instrument and need to be treated with care
- **Reset torque:** After use set the torque to its lowest setting. If you don't over time the springs inside the wrench can lose their normal tension
- **Store Safely:** All torque instruments should be stored in their original case
- **Keep wrench maintained:** Torque wrenches should be cleaned and calibrated on a yearly basis

DONT'S

- **Use as a power bar:** Torque wrenches should never be used as a power bar to shift stubborn fastenings
- **Abuse your wrench:** Do not drop your torque wrench or overload the wrench with a pipe extension
- **Store in conditions that lead to corrosion:** Avoid any storage locations that are subject to high or low temperatures and high humidity
- **Use without PPE:** We recommend safety glasses when using any torque wrench or torque product

SPANNERS & WRENCHES

QUALITY AS STANDARD

Our range has been developed over many years with DIN and ISO standards as the lowest benchmark when it comes to quality and size tolerances. This is a policy that has resulted in many top positions on best-buy lists in consumer and trade magazines. The range includes many different types of spanners for most application areas and personal taste.

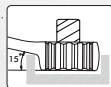

COMBINATION SPANNERS

High mechanical performance and optimized for increased accessibility complying with DIN and ISO standards

Manufactured and designed in accordance with DIN3113A in high grade chrome vanadium steel

Size clearly marked on the side of the spanner for easy & quick visibility

The ring head is offset 15° to facilitate use even on flat surfaces

TengTools "Hip Grip" feature means the contact surface grips on the flat surfaces of the nut or bolt rather than on the corner

RATCHETING SPANNERS

'R' range contains a lever to quickly switch between left and right-hand action. With the 'RS' range you flip the spanner over to change ratcheting direction.

'R' range is offset at 15° for use against flat surfaces while the 'RS' range is straight to reach the nut flat

Do's and Dont's of Spanners

DO'S

- **Use the right size spanner** for the job: Make sure you have the correct size spanner for the nut or bolt you are working on.
- **Keep the spanner clean and dry:** Wipe down the spanner after use to prevent rust and corrosion.
- **Apply pressure correctly:** Apply pressure to the spanner in the direction that tightens the nut or bolt.
- **Use the right technique:** Use a firm grip on the spanner and turn it with a smooth motion. Avoid jerking or twisting the spanner, as this can cause damage to both the tool and the fastener.
- **Inspect the spanner regularly:** Check the spanner for any signs of wear or damage. Replace any damaged tools immediately.

DONT'S

- **Use a damaged spanner:** Do not use a spanner that is damaged or worn, as it may slip or break during use.
- **Use a spanner as a hammer:** Do not use a spanner as a hammer or pry bar, as this can damage both the spanner and the object you are working on.
- **Over-tighten nuts and bolts:** Do not over-tighten nuts and bolts with a spanner, as this can cause damage to the fastener and the tool.
- **Use a spanner in wet or oily conditions:** Do not use a spanner in wet or oily conditions, as this can cause the tool to slip and cause injury.

SCREWDRIVERS

MORE COMFORT MORE POWER

Unlike other brands the TengTools screwdriver blade has steel alloy wings that the plastic handle is moulded around. This allows for greater torque to be put on the screwdriver, ensures the blade is dead straight and stops the blade from moving in the handle.

Size and tip marked at the bottom of each handle for easy identification

Hole in the handle can be used in a fall arrest system, for storage and for use as a T-handle

The bi-material handle is designed for increased comfort and smooth action preventing blisters after continuous use. It gives better support and increased power transfer.

The soft black material prevents the screwdriver from sticking in the hand allowing for rapid movement

The red resistant plastic is used for the core and ensures the blade is held securely

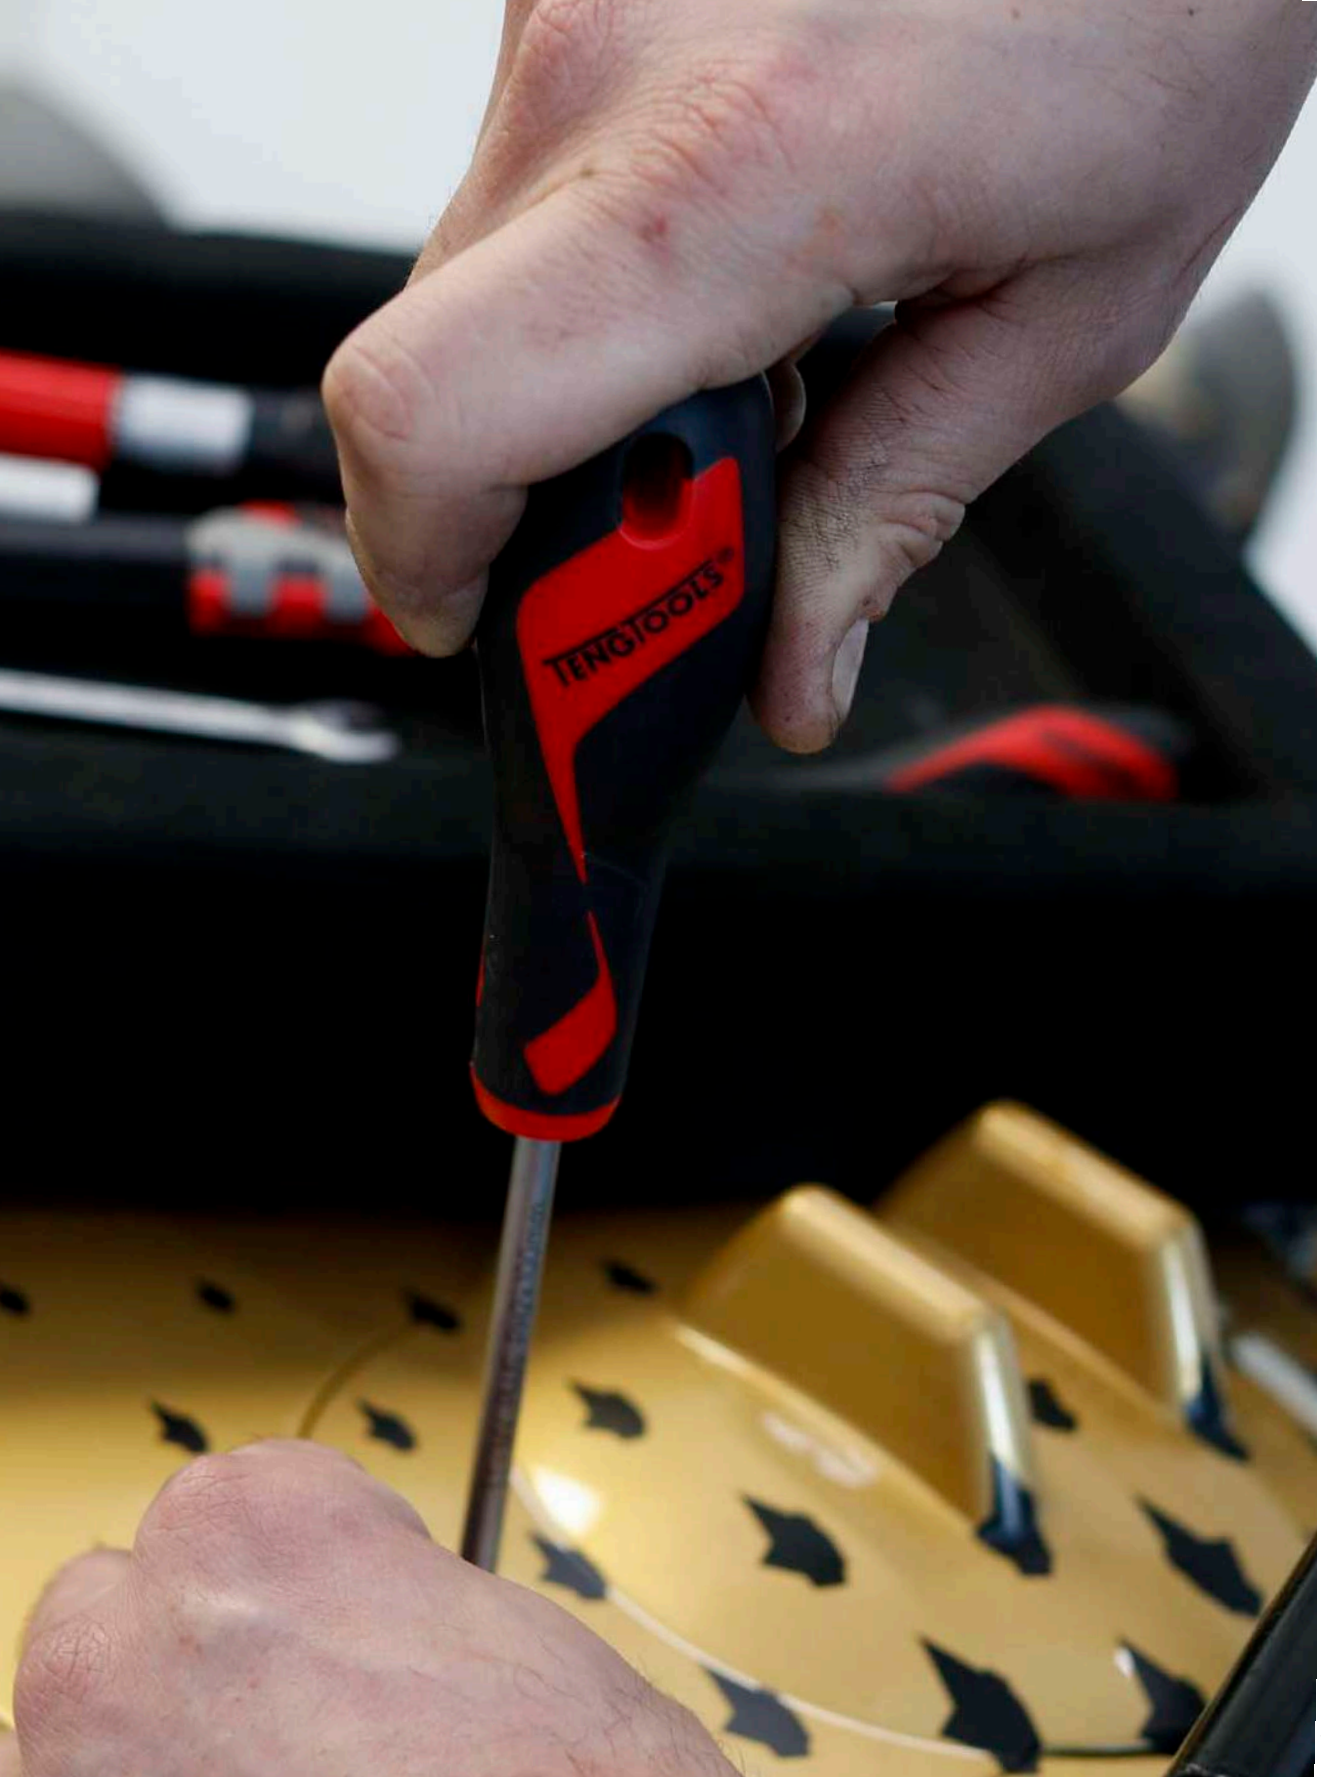

Size marked on shaft for identification while in use

Shaft made from TengTools TT-MV PLUS steel alloy for greater strength and material flexibility

Magnetic tip designed to maximise torque transfer and reduce wear

Designed and manufactured to DIN and ISO industrial standards

CHOOSE THE RIGHT HANDLE FOR THE RIGHT TASK

A larger type of handle allows for more power and force to be executed with the driver while a smaller type of handle make it easier to work quickly as less force is required with the driver.

Do's and Don'ts of Screwdrivers

DO'S

- Use the right tip
- Keep it clean & dry
- Apply extra torque correctly
- Choose the right handle

DONT'S

- Do not use the wrong tip
- Do not use the screwdriver as a lever
- Do not use on live electrics
- Do not use too much power

BITS & DRIVERS

QUALITY YOU CAN TRUST

All TengTools bits with a hexagonal drive are designed and manufactured in accordance with the latest industrial standards. Screwdriver bits and socket bits are classified as consumables and thus are only guaranteed to meet dimensional standards.

An extensive range of bit drivers are available in the range including ratcheting drivers, stubby drivers and folding handle drivers for greater power transfer. A selection of drivers offer the option of storing bits in the handle so you do not have to waste time searching for bits when you need them.

Bit sets supplied in handy pocket sized storage with bits that are easy to access. More belt clip sets have been added to the range to help you keep small tool sets in arms reach at all times.

HEX & TX KEYS

VERSATILE, STRONG AND DURABLE

TengTools wide range of hex & TX keys consists of a range of keys made of chrome vanadium steel for industrial use and a series made of chrome-molybdenum for heavy duty usage.

CHROME VANADIUM STEEL

Stronger, harder and more durable than regular carbon steels. This guarantees the high level of quality that you would expect from a TengTools item

Our cases are designed to hold the wrenches tight enough so they didn't fall out but with a flexible enough grip that they were are still easily removed

For higher torque applications it is better to use the straight end Hex keys for maximum fastener engagement

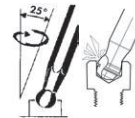

Available in metric & imperial sizes up to 36 mm or 5/8"

CHROME MOLYBDENUM STEEL

It is an alloy tool steel with chromium (Cr), molybdenum (Mo), iron (Fe) and carbon (C) alloy elements. The highest quality steel that we use. It is particularly hard and strong, but also has an amount of flex. Ideal to use when more torque is required.

Ballpoint heads are ideal for areas that are hard to reach. Fastenings can be turned at an angle of 25° in a Hex or TX key.

PLIERS

DESIGNED TO MAXIMISE PERFORMANCE

The extensive TengTools range includes pliers for most applications. In addition, the range includes the usual side cutters, combination pliers and slip joint pliers as well as a number of cable pliers, side cutters for cable ties, frapping pliers, nail nippers, electronic pliers, precision shears and tweezers. Two types of handles are available to choose from: slim rubber dipped as well as ergonomic TPR bi-material handles.

Made from chrome molybdenum alloy steel for maximum durability and strength

The cutting capacity is laser marked next to the cutting edge makes it easy to see which pliers you need to choose

TPR GRIP

An ergonomic bi-material handle that is more comfortable in your hand

Extra support when using greater force and a lighter weight

The total length is designed to provide maximum leverage for each pair of pliers, irrespective of whether they are combination, water pump, flat or circlip pliers

VINYL GRIP

A light compact material that is textured to avoid the tool slipping in your hand. The slim design allows for greater access in tight spaces

INSULATED TOOLS

PROTECT YOURSELF FROM ELECTRIC SHOCK

All 1000-volt tools from TengTools conform to or exceed all specifications that the relevant authorities have established. Each tool is individually tested before it is marked with a special standard tag and a marking that indicates the year of manufacture.

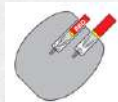

INSULATED SCREWDRIVERS

The bi-material handle is designed for increased comfort and smooth action preventing blisters after continuous use. It gives better support and increased power transfer.

Size and tip marked at the bottom of each handle for easy identification

Integrated protective insulation with two colours to clearly indicate if there is any damage to the insulation

RBD shafts are ultra slim allowing for recessed screws to be accessed easily

TT-MV PLUS steel alloy for greater strength and material flexibility

INSULATED RATCHET

Twist reverse mechanism for quickly changing between tightening and loosening

Insulation made in two parts, yellow insulating core and a red outer layer. Any damage to the insulation can be detected quickly with the visibility of the yellow core layer

72 Teeth ratchet give a working arc of just 5° making it ideal for working in confined spaces

Insulation properties have been tested in resistance to cold and fire as well as in pressurised environments

Ergonomically designed handle for increased comfort and smooth action

Manufactured to the highest standard

IEC 60900 is an international standard that defines the requirements and test methods for insulated hand tools intended for live working up to 1000 V AC and 1500 V DC.

EN 60900 is the European adoption of IEC 60900, technically identical to the international version, specifying the same mechanical, thermal and dielectric tests (including the 10,000-volt insulation test) to ensure tools are safe for use at 1,000 V.

VDE is an independent authority that tests and checks tools with regard to construction, production and packaging

INSULATED INTERCHANGEABLE BLADE SET WALLET 9 PIECES

- » Insulated Handle for Interchangeable Blades L
- » Interchangeable Blade Insulated Screwdriver
- » 3, 4, 5.5, 6.5, PH1, PH2, PZ1, PZ2

MDV909N £65.90

INSULATED SCREWDRIVER SET FLAT & PH 6 PIECES

- » Flat Insulated Screwdriver
- » 0.4×2.5, 0.5×3.0, 0.8×4.0, 1.0×5.5
- » PH Insulated Screwdriver
- » PH1, PH2

MDV906N £54.50

What are our insulated tools tested for?

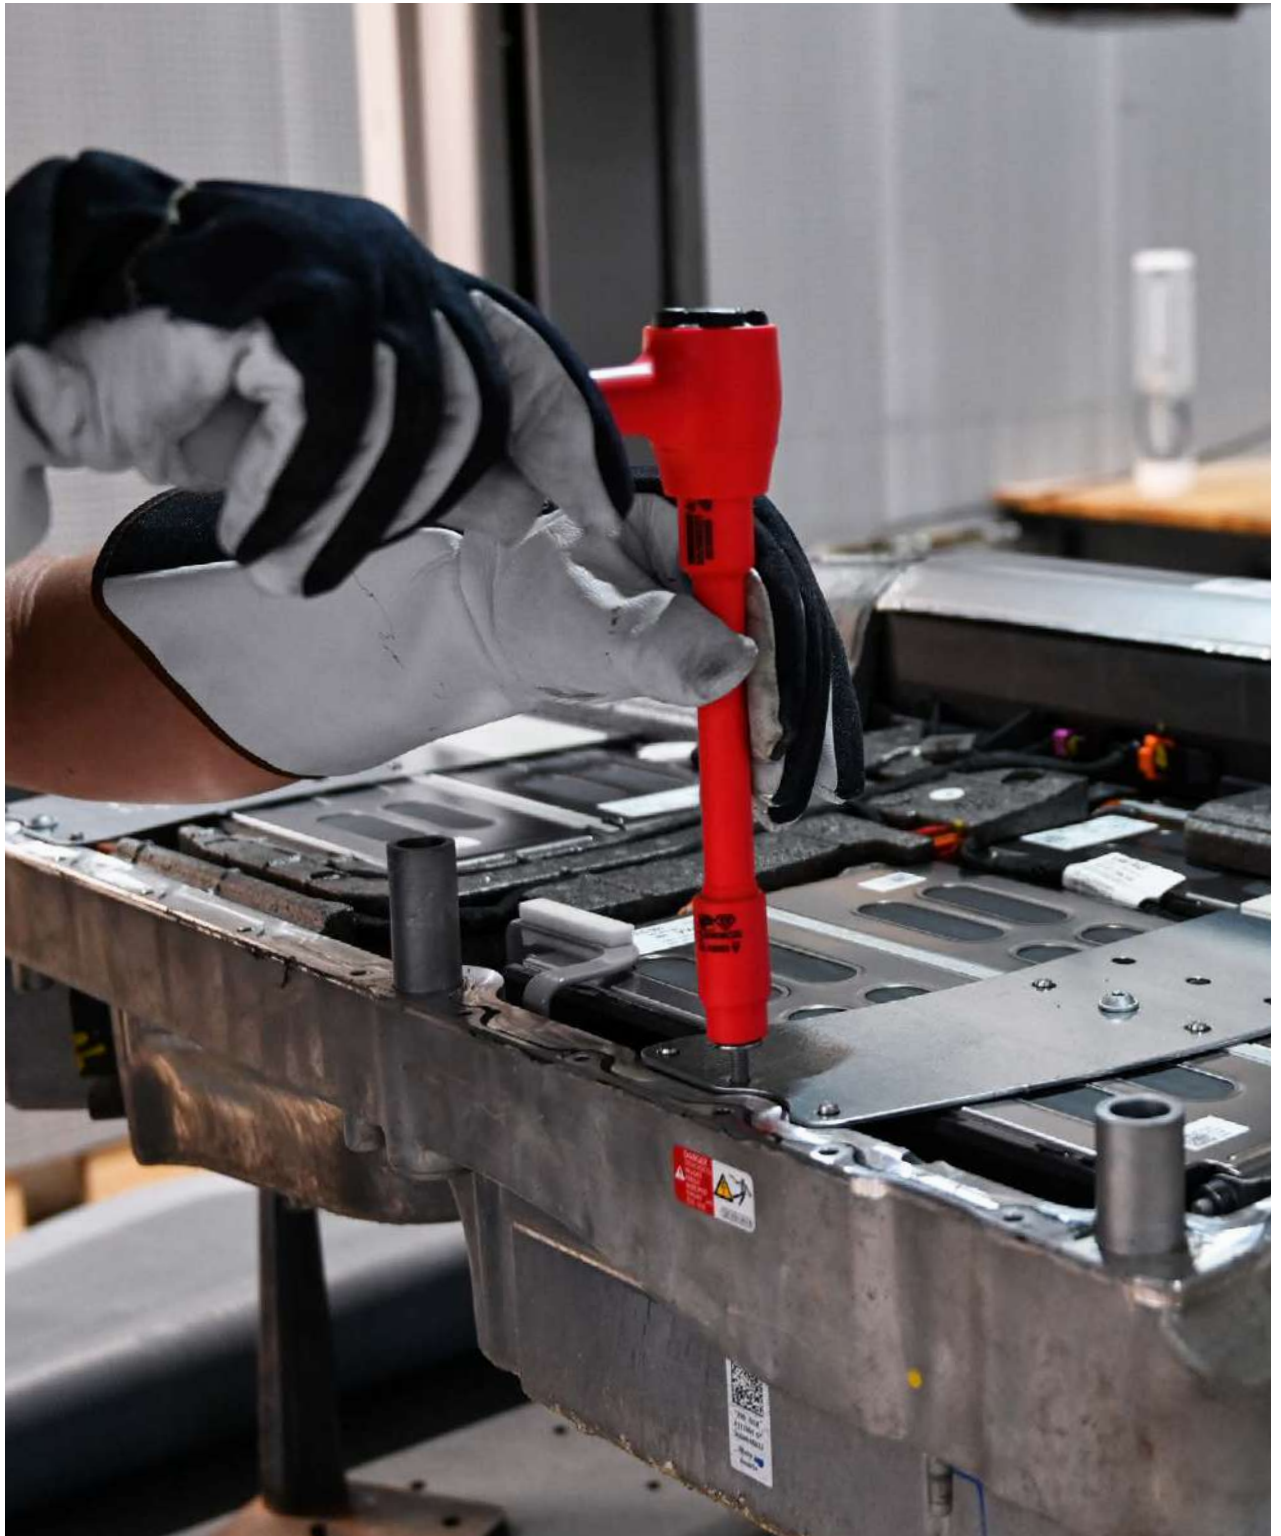

- Insulation properties, i.e. resistance up to 1000 volts in dry or humid environments.
- Resistance to the cold, i.e. how well the tool withstands the cold
- Durability, i.e. that the insulating handles do not come loose
- Resistance to fire, i.e. how well the tool withstands fire
- Insulating properties under pressure, i.e. how well the tool maintains its insulating properties when subjected to pressure

C

Tools marked with the letter "C" according to IEC/EN 60900 have been tested for cold condition performance. This means the insulation has undergone additional testing at -20°C to ensure that the material remains safe, durable, and resistant to impact even in low-temperature environments.

A "C"-marked tool guarantees that:

- The insulation has been conditioned at low temperature.
- The tool has passed mechanical impact tests after cooling.
- The insulation continues to meet all electrical safety requirements.

CUTTING TOOLS

PRECISION, PERFORMANCE, AND DURABILITY

From hacksaws and utility knives to precision snips and blades, each tool is engineered to deliver clean, accurate cuts with minimal effort. Designed for professional use across workshops, garages, and industry, TengTools cutting solutions combine ergonomic comfort with long-lasting sharpness — giving you the control and confidence to get the job done right, every time.

Do's and Dont's of Hacksaws

DO'S

- **Use the right blade:** Choose the right blade for the material you are cutting. A fine-toothed blade for thin metal, and a coarse-toothed blade for thicker materials.
- **Wear protective gear:** Wear safety glasses and gloves to protect yourself from flying debris.
- **Use the correct technique:** Hold the saw with both hands and use long, smooth strokes. Avoid twisting or bending the blade.
- **Keep the saw blade lubricated:** Lubricate the saw blade with a light oil to reduce friction.
- **Store the saw properly:** Store the saw in a dry place with the blade covered.

DONT'S

- **Force the saw:** Do not apply excessive pressure on the saw, as this can damage the blade or cause it to break.
- **Use a dull blade:** Do not use a dull blade, as this can cause the saw to become stuck or make rough cuts.
- **Twist or bend the blade:** Do not twist or bend the blade while cutting, as this can cause it to break or become damaged.
- **Use the wrong blade:** Do not use the wrong blade for the material you are cutting, as this can cause the blade to wear down quickly or break.
- **Ignore safety gear:** Do not forget to wear protective gear such as safety glasses and gloves, as this can increase your risk of injury.

MEASURING TOOLS

ACCURACY IS KEY

Our range of Measuring Tools have been developed by focusing on TengTools users requirements across the automotive & industrial sectors. All tools are available individually but are also available in the unique TengTools TT trays so you can add them to your existing tool kit or include them when you are building your ultimate tool kit.

MEASURING TOOLS

MICROMETER 0 - 25MM

- Friction thimble and locking nut for easy operation
- Forged frame with hardened steel and polished measuring surfaces
- Matt chrome plated scale for easy reading
- Supplied with a plastic storage case
- Designed and manufactured to DIN863

MIR25	0 - 25	25	0.01	± 0.004 mm	197 g	£52.40

VERNIER CALLIPER 0-150MM

- 4 function calliper to measure height, width, depth and step
- Metric and inch scales with 0.05mm and 1/128" scales
- Frosted chrome plated scale for easier reading
- Stainless steel construction with lapped edges
- Supplied with a plastic storage case
- Designed and manufactured to DIN862

CALV150	0-150	40	0.05	143 g	£46.20	

DIGITAL CALLIPER 0-150MM

- 4 function calliper to measure height, width, depth and step
- Adjustable between mm and inches
- Reset button and zero set in any position
- Automatic switch off to conserve batteries
- 0.01mm reading scale with 10mm high figures
- Uses CR2032 batteries (supplied)
- Supplied with a plastic storage case
- Designed and manufactured to DIN862

CALD150	0-150	40	0.01	166 g	£78.10	

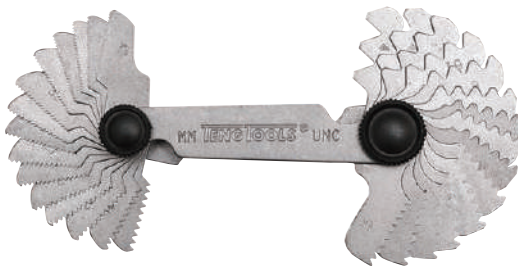

FEELER GAUGE

mm

- Blades for measuring from 0.05mm to 1.0mm
- Hardened rolled steel for durability and accuracy
- Fold up case with tightening screw for easy storage

GAUGE THREAD MM/UNC 0,25-6,0MM

mm
UNC

- 54 blades in a handy holder with tightening screws
- Thread gauge 60°
- Suitable for measuring metric and UNC threads
- Manufactured from #45 steel for a long lasting gauge

	#	(mm)	(UNC)		
TGMUNC	54	0.25-6.0	4-42	67 g	£23.20

DIAL GAUGE WITH MAGNETIC STAND 0-10 MM

mm

- Aluminium dial indicator
- 57mm diameter dial with a turnable scale and two tolerance indexes
- An extra pointer indicates whole millimetres to make measurements simple
- The stand has central locking
- A strong magnet in the base to hold the stand in place when in use

	(mm)			
DGMM	0-10	0.01	1662 g	£129.00

STEEL RULE

mm AF

- Stainless steel to avoid corrosion
- Hanging hole for easy storage

	(mm)	(mm)		
ST200	200 mm	20	0.8 mm	27 g £11.0
STMM1150	150 mm	20	0.8 mm	13 g £5.70

MEASURING TAPE METRIC/INCH

mm AF

- mm and inches for international use
- ABS case for durability
- Rubberised grip for a more secure grip especially when wet or oily
- Tape lock and belt clip for secure storage when being used
- Power return tape for automatic rewinding
- Aligning hook for internal/external measurements
- Designed and manufactured to Cat II

			(mm)		
MT03	3 m	10 ft	13	91 g	£9.30
MT05	5 m	16 ft	19	187 g	£14.10
MT08	8 m	26 ft	25	370 g	£27.30

MEASURING TAPE METRIC

mm

- Graduated in mm only
- ABS case for durability
- Rubberised grip for a more secure grip especially when wet or oily
- Tape lock and belt clip for secure storage when being used
- Power return tape for automatic rewinding
- Aligning hook for internal/external measurements
- Designed and manufactured to Cat II

			(mm)		
MT03MM	3 m		13	91 g	£9.30
MT05MM	5 m		19	187 g	£14.10
MT08MM	8 m		25	370 g	£27.30

TORPEDO SPIRIT LEVEL

- Magnetic aluminium "torpedo" spirit level
- 3 magnets on the underside help fix the level to ferrous work pieces
- One horizontal, one vertical and one 45° angled vials
- Crush proof, durable vials with high transparency for easy reading
- Highly resistant to ultra violet light and fluctuations in temperature
- Shock absorbent end protectors to reduce the risk of damage
- Temperature proof vial mountings to reduce the risk of distortion

	 (mm)	 (mm)	 (mm)			
SLT01	230	16	38	±1,0mm/m	144 g	£38.60

SPIRIT LEVEL MAGNETIC

- Magnets on the underside help fix the level to ferrous work pieces
- Crush proof, durable vials with high transparency for easy reading
- Highly resistant to ultra violet light and fluctuations in temperature
- Shock absorbent end protectors to reduce the risk of damage
- Temperature proof vial mountings to reduce the risk of distortion

	 (mm)	 (mm)	 (mm)			
SLM0300	300	24	50	±0,75mm/m	330 g	£86.80
SLM0400	400	24	50	±0,75mm/m	368 g	£87.10
SLM0600	600	24	50	±0,75mm/m	467 g	£98.60
SLM1000	1000	24	50	±0,75mm/m	834 g	£118.90
SLM1200	1200	24	50	±0,75mm/m	893 g	£153.80

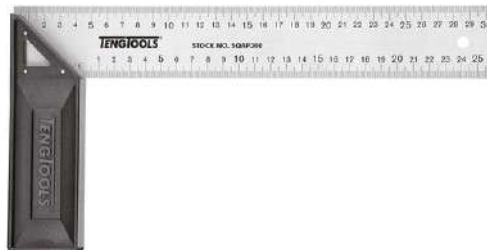

SLIDING BEVEL

- Check edges for consistency by sliding the edge over the material
- Duplicate angles for marking by setting the adjustable blade
- Straight and true stainless steel blade for accuracy
- Plastic stock for reduced weight and a better grip

AB200	200	25	72 g	£10.70

TRY SQUARE

mm

- Stainless steel blade with an anodised aluminium stock
- Blade measures 1.5 x 45mm with the stock being 18mm wide
- Milled working surface with deep etched markings
- Highly resistant to wear

SQAA200	200	± 0.03 mm	224 g	£37.60
SQAA250	250	± 0.03 mm	249 g	£39.90
SQAA300	300	± 0.03 mm	275 g	£45.00

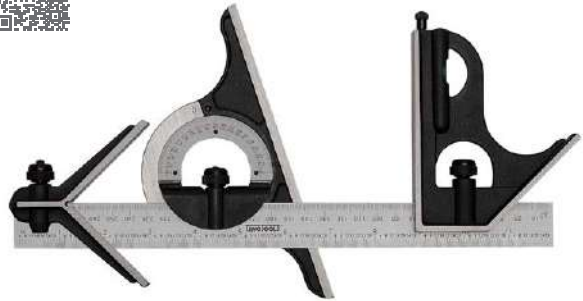

SQUARE BASE

mm

- Zinc plated for corrosion resistance
- Base square design enables the square to be sat on a work surface

SQAB10070	100 × 70	163 g	£22.60
SQAB150100	150 × 100	315 g	£32.00
SQAB200130	200 × 130	694 g	£46.80
SQAB300175	300 × 175	1205 g	£92.20

COMBINATION SQUARE 300MM

- For measuring and checking angles
- Graduated in mm and inches for universal use
- 300mm steel rule with a reversible protractor, adjustable angle ledge and centre head
- Angle ledge and protractor both include a spirit level

SQAC300	0-180°	300	110	63	1234 g	£153.90

AUTO TOOLS

ESSENTIALS FOR ANY GARAGE

When working on motors and general servicing it is vital that you have the right tools ready when you are. Whether it is a spark plug socket or hose clamps you need tools that are great to work with and bring better results.

AUTO TOOLS

COTTER PIN PULLER

MDH-S 90° 245 Bi-material 107 g £10.10

GASKET SCRAPER 22MM

MD-SCR 245 Bi-material 134 g £20.60

HOOK TOOL CURVED

MDH-L 200 Bi-material 98 g £9.70

AWL STRAIGHT

MDA180 164 Bi-material 27 g £6.60

AWL ROUND TIP

MDA-R 245 Bi-material 98 g £9.70

COTTER PIN PULLER S

MDP90 90° 164 Bi-material 27 g £6.60

HOOK TOOL 35°

MDP35	35°	164	Bi-material	27 g	£6.60

AIR TOOLS

ESSENTIAL FOR ANY WORKSHOP

Air is a powerful and versatile resource that can help you get the job done quickly! If you need to cut through steel or machine-tighten a bolt, you will need a certain amount of torque. Choosing a tool for its convenience or cost really won't do any good if it isn't strong enough to get the job done. This range of air tools pack a real punch and have been developed to exceed the demands of a professional auto workshop.

AIR TOOLS

AIR IMPACT WRENCH

3/8"

ARWM38

1562 g

£362.00

Bolt capacity	M13
Free speed	9000 rpm
Max torque (3 steps)	115/285/465 Nm
Max reverse torque	361 ft-lb
Hammer mechanism	Twin hammer
Sound level *	95.4 dB
Vibration **	4.96 m/s ²
Minimum hose size	3/8"
Air inlet	1/4" PT-19"
Air consumption at 100% int.	3.7 cfm
Length	159.4

TENGTTOOLS®

SERVICE CHARGES

All our products are covered by warranties and guarantees that cover faulty workmanship or faulty material but we also have products with moving parts that after time need repair or servicing. Often the end user is able and willing to service the tool or machine themselves and to help with this we have produced a spare parts manual for tools and machines where it is possible to replace worn or damaged parts. A copy of this or replacement copies of manuals for other tools and machines are all available on request. When the end user cannot or will not service the tool or machine themselves TengTools can offer a full repair and servicing facility which is chargeable at a price that is designed to cover our costs only. We can offer this service via stockists and will not normally deal direct with the end user

Servicing and recalibration of torque wrenches is available on request from your local TengTools stockist. There is a cost for this service unless the fault is covered by warranty. Servicing and repair of ratchets is also available on request at a cost, unless the fault is covered by warranty. Servicing and repair of air tools is offered through your local TengTools stockist and a cost will be determined upon request, unless the fault is covered by warranty. If we believe the repair to be uneconomic we will of course contact you before starting any work that would incur charges. All TengTools hex drive bits are designed and manufactured to the latest industry standards. However, screwdriver and socket bits are classified as consumables and as such are only guaranteed for conformity to dimensional standards.

SUMMARY OF TERMS & CONDITIONS OF SALE

All orders are accepted by Teng Tools UK and their stockists subject to their Terms and Conditions of Sale. Teng Tools UK only distribute through their approved stockists and do not supply goods directly to the end user. If you are a stockist or potential stockist then a complete copy of the Teng Tools UK terms of trade is available on request. If you are an end user wishing to purchase any of the goods in this catalogue then details of your local stockist can easily be found at www.tengtools.com or you can contact Teng Tools UK through the web site "Contact us" area. All descriptions of the products and services contained within catalogues, promotional literature and the Teng Tools web site, or otherwise communicated, to the Customer are approximate only, and shall not form any part of the contract between Teng Tools UK and the Customer. The prices shown in this Product Guide correspond to those on the web site but are for guidance only. All prices exclude VAT which will be charged at the rate applicable at the date of despatch. Whilst Teng Tools UK will try to maintain the prices quoted in this catalogue and on its web site, Teng Tools UK reserves the right to change them without prior notice at any time before despatch. Teng Tools UK executes orders to the Customer's requirements, but reserves the right to substitute one product for another where the product has been superseded or where the product is the same brand and the product technical function, performance and quality can be seen as equivalent. To the extent that orders cannot be fulfilled completely from stock, the unfulfilled balance will be noted and then charged at a price that is valid at the date of order. Alternatively, if so requested, where orders cannot be fulfilled completely from stock, the unfulfilled balance will be considered cancelled. Unless otherwise stated, electrical ratings represent safe working limits. Dimensions and other physical characteristics are subject to normal commercial tolerances. Teng Tools UK reserves the right, without prior notice, to discontinue any product or to make design changes as part of its continuous programme of product improvement, or to assist product availability. Where possible, future design changes will be indicated against the description in the Teng Tools web site. Teng Tools UK recommends that the Customer verify dimensions and other data published in the web site together with future availability, before incorporating products into designs or for other critical purposes. The information contained in this catalogue was, so far as Teng Tools UK was aware, correct at the time of going to press and Teng Tools UK do not accept responsibility for any errors. The Customer shall ensure that all warnings, labels, instructions, manuals and other information in respect of the products or their use which are supplied with the products are not lost or damaged in any way whilst the products are in its possession or under its control and that they are supplied with the products when it releases them from its possession or control. Teng Tools UK warrants that if defects appear in products due to faulty workmanship or materials, under proper use, it will replace or repair the product. If not explicitly expressed in a Teng Tools UK catalogue, this warranty is subject to a claim being made to Teng Tools UK within 12 months of the sale to the final consumer. This warranty is also subject to the products or parts to which the claim relates being returned to Teng Tools UK within that period suitably packaged, carriage paid and, where relevant, in accordance with any particular instructions which Teng Tools UK may have notified to the Customer at the time of supply. Teng Tools UK shall not be under any liability for damage, loss or expenses resulting from the failure to give advice or information or the giving of incorrect advice or information whether or not due to its negligence or that of its employees, agents or sub-contractors. Teng Tools UK liability (if any) to the Customer for a breach of any express or implied terms of the contract between it and the Customer, or any order accepted by Teng Tools UK, or any other duty of any kind imposed on Teng Tools UK by law arising out of or in relation to the contract or order, or in respect of any defect in the products, shall be limited to the sum shown in the current full terms and conditions of sale. The Customer acknowledges that Teng Tools UK owns the copyright in this catalogue, and that its whole or partial reproduction without Teng Tools prior written consent is prohibited.
